What Is a VIBE Machine?

The V.I.B.E. machine is an original 21st century electronic device, derived from technology discovered in the early 1900's. You simply plug it into your wall, and it sends out an amazing vibrational frequency that brings the body back to its natural state of being.

How Does It Work?

Sitting 2-3 feet from the V.I.B.E. Machine, up to 5 people can be with the device at one time, as it will automatically turn on and off in 30 seconds bursts. Using it for up to 4 minutes twice per day, it will raise your body's energetic vibration and regenerate the cells that are non-moving which are where cancers cells tend to grow.

The V.I.B.E. machine emanates an extremely broad bio-photonic electromagnetic field of energy that causes each of your body's atoms to oscillate at their optimum frequency. The result is the body's natural immune system takes over & dumps out every toxin that has been built up in it (heavy metals, bacteria, parasites, viruses etc.) leaving the body clean & free of toxicity. When all your body's atoms are vibrating at a higher frequency, you respond physically, emotionally and mentally at your optimum potential. For
